DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: All claims are drawn to a liquefied natural gas or cryogenic fluid handling facility using conventional vaporizers that injects fluid into an uncompensated salt cavern. Much of the related prior art (see citations below) are drawn to the use of "compensated" salt caverns, which employ a displacing fluid and are therefore not equivalent to the present invention, and the differences between compensated and uncompensated salt caverns is considered to be substantial. Since a search of the prior art did not reveal any references either alone or in an obvious combination all the limitations recited by the independent claims, the claims are considered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, filed 23 September 2004, with respect to the rejections of claims 1-7 under 35 U.S.C 102(b) and 35 U.S.C. 103(a) have been fully considered and are persuasive. See reasons above. The rejections of claims 1-7 have been withdrawn.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, all of which are drawn to the storage of fluids in underground facilities:
